EDUCATION

University of Management and Technology (UMT) Lahore, Pakistan | BS Computer Science | 2023–2027 (Expected) CGPA: 3.41

- Specializing in Full-Stack Development (MERN Stack) and AI/Machine Learning
- Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Computer Networks, Software Engineering, Operating Systems

PROFESSIONAL SUMMARY

Full-stack developer specializing in **Next.js, React.js, and Node.js/Express.js**, with hands-on experience in **FastAPI, Supabase, and MySQL**. Skilled in building and deploying production-grade web applications with system design principles, Docker, and CI/CD pipelines, along with RESTful APIs, real-time features, and secure, role-based access control.

Also proficient in AI/Machine Learning and Python-based data solutions, with a strong foundation in agile development, version control (Git/GitHub), and cross-functional team collaboration.

EXPERIENCE

Full Stack Developer — Internship | SNGPL (Head Office, Lahore)

- Worked as a Full Stack Developer during internship at SNGPL Head Office, contributing to real-world enterprise software development

Freelance Developer

- Deployed local projects as a freelancer, managing end-to-end delivery and deployment for client-based web applications

PROJECTS

Pak Group of Hostels — Hostel Management System | Next.js · Node.js/Express · Supabase (PostgreSQL, Auth, Storage) · Nodemailer · Vercel · Render

- Full-stack hostel management platform with student/admin dashboards, real-time room allocation, payment verification, and role-based access control (RLS) — built and security-audited end-to-end using a scrum-based, sprint-wise development workflow, and deployed with a separate frontend/backend architecture (Vercel + Render) with custom domain and CI/CD

Payment Management System (SNGPL) | Next.js · FastAPI · MySQL

- Developed a payment management system with a Next.js frontend, FastAPI backend, and MySQL database for structured, secure transaction handling

Skill Bridge (Final Year Project — In Progress) | Next.js · Express.js · Supabase

- Building a skill-matching platform with a Next.js frontend, Express.js backend, and Supabase database, currently under development as final year project

Movie Recommendation System | Python · Scikit-learn · Pandas · NumPy · Machine Learning · Data Preprocessing

- Built content-based filtering using Cosine Similarity to recommend movies based on user preferences
- Cleaned and preprocess raw datasets with Pandas and NumPy to optimize recommendation accuracy

Music Recommendation System | Python · ML · Data Visualization · Matplotlib · Seaborn · Content + Collaborative Algorithms

- Developed an intelligent music recommendation engine using data clustering algorithms to group similar tracks

AI Chatbot Application | React.js · Node.js · Express.js · OpenAI / Gemini API · REST APIs · Full-Stack Development

- Engineered a real-time AI chatbot with dynamic frontend states and secure backend API communication

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Responsive Design, UI/UX Principles

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT/OAuth, API Integration

AI / ML: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing

Databases: MongoDB, MySQL, SQL, Supabase (PostgreSQL)

DevOps & Architecture: System Design, Docker, CI/CD Pipelines

Languages: Python, C++, JavaScript

Tools: Git, GitHub, Postman, VS Code, Google Colab, MS Office

Core Competencies: OOP, Data Structures & Algorithms, Agile Methodology, Version Control, Debugging, Code Review, Problem Solving

CERTIFICATIONS

- Next.js 14 — Coursera
- Docker Fundamentals and Container Management — Coursera
- Basics of Management — Coursera

SOFT SKILLS

Problem-Solving & Analytical Thinking | Quick Learner | Team Collaboration | Time Management | Client Communication | Adaptability | Attention to Detail | Remote Work
